

Additional Public Comments

Received on the Updated Preliminary Plan as of 1/6/2022

Linda W.

why did your ranking member only first see this choice of maps on the day it was announced. Mr. Grove - what ?? you aren't working together????

Deb T.

This discussion would be so much more interesting if the Republican caucus and the Governor included the Assembly's elected Democratic members. Your comment that the Dems should host their own website and proposal begs the question, why don't both caucuses have a seat at the table at the same time?

Roger K.

The Cambria/Somerset MSA have common problems, needs, and interests. These counties should be in one congressional district. Somerset County should not be in the southwest district which has more in common with the Pittsburgh area. Greater Johnstown should not be divided east and west into separate districts. Johnstown has enough challenges already without being split in half. Likewise Northern Somerset County has more in common with Southern Cambria County and should be represented by the same person. The current map is a prescription for continuing the decline of the region rather than giving us hope for the future. Common sense dictates that Cambria, Indiana, Somerset, Blair, Bedford, Clearfield, and Huntingdon Counties should have one voice in Congress to represent their common needs and concerns.

Rob K.

As I read the proposed maps for Congressional Districts it looks like my 1st District has a population of 302,599 which is far more than any other District. This doesn't look fair to me.

James K.

Redistricting may destroy what our local committee has built over the past few years. Leadership's activity seems to be irresponsible and unlikely to receive any of my future support or votes.
